

Cumulative Release Notes

Version: 1.13

Release Date: 4/10/2017

Bug Fixes:

- Fixed bug requiring archive-R to be unlocked after upgrading to latest from v1.09 (*shipping version*).
-

Version: 1.12

Build Date: 4/03/2017

Bug Fixes:

- Updated archive-R with logic to look for either a .XML or .AVS Media Composer settings file without producing warning message.
 - Fixed bug relating to .OPA file association not being created during installation.
-

Version: 1.11

Build Date: 3/27/2017

Bug Fixes:

- Fixed bug causing archive-R to be locked after rebooting system.
-

Version: 1.10

Build Date: 3/23/2017

Bug Fixes:

- Fixed bug causing archive-R to freeze if there was no Media Composer .avs settings file, and only the newer .xml settings file type.
-

Version: 1.09

Release Date: 6/17/2016

New Features:

- Updated installer to automatically remove previous version.

Bug Fixes:

- Fixed bug producing restoration errors when media hash is -1
-

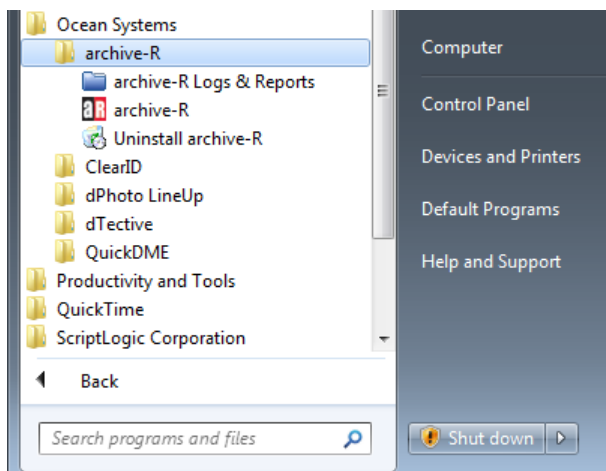

Version: 1.08

Build Date: 8/06/2015

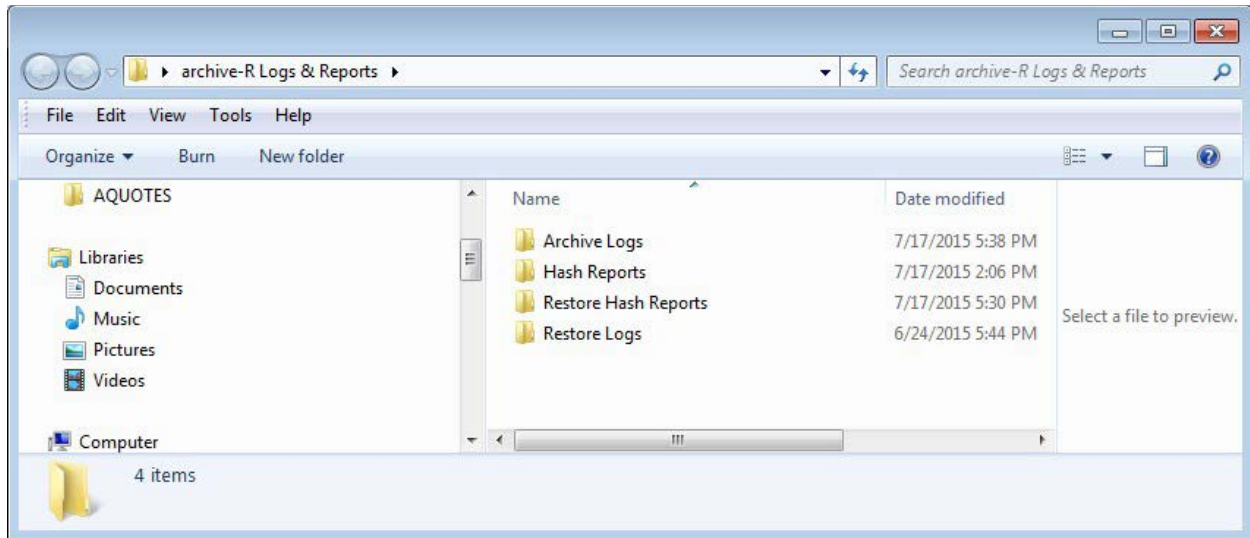

New Features:

- New archive log option on archive.

Now creates an archive log on archive if you have “hashing” selected as an archive option.

These logs can be accessed from: Start Menu > Ocean Systems > archive-R > archive-R Logs and Reports

Inside the “archive-R Logs and Reports” you will find:

- Achieve Logs
- Restore Hash Reports
- Restore Logs

NOTE: The Hash Reports folder show in the picture is a legacy from the old naming conversion which is now called Restore Hash Reports. Your previous Hash Report from restoring .OPA files before are stored in there. You can copy those into the new Restore Hash Reports folder and delete the old folder.

Version: 1.06

Release Date: 6/17/2015

New Features:

- CD/DVD/Blu-Ray burner support updated to support more devices.

Bug Fixes:

- Fixed bug producing archive error if archiving project with a 0 Kb file in it.
-
